D. MacPherson, Adjutant.

Miss Marjory Murphy, of Cowley,
has graduated from the Calgary normal
school for teaching.

The death occurred in Graftontown,
Coleman, on Wednesday evening of
last week of Mrs. Ernest Hill in her
sixty-fifth year. Mrs. Hill was born at
Eccles, Lancashire, England, and came to Coleman with her husband
sixteen years ago. Her husband survives.
The funeral took place on Sunday afternoon last, with services conducted in St. Alban's Anglican church by Rev. J. R. Hague. The remains were laid to rest in the Coleman Union cemetery.

MOTORISTS URGED TO OBTAIN LICENSES

Motor car owners are being urged to make early application for their 1943-44 licenses and ration coupon books, which are obtainable at offices of the Alberta Motor Association.

Congestions near the end of this month are to be avoided, as this will mean only delay in obtaining the required licenses and coupons speedily. The A.M.A. offices are authorized to issue the provincial licenses and number plates, and also drivers' licenses. The coupon books issued at these offices are for those in "A" category under the Dominion ration regulations, entitling them to 40 gallons of gasoline for the next license year opening April 1st.

Those who claim to be in the essential category, which would give them additional gas coupons, must send their provincial license receipt and application form to the regional oil controller at Edmonton.

The provincial secretary's department has urged car owners to make their applications early to avoid a rush and congestion at the end of March. This matter should be attended to now.

"V"

HOUSEWIVES PLAN FOR CANNING NEEDS

Arriving by hundreds at the ration offices of the Wartime Prices and Trade Board, are applications for sugar for canning. Alberta housewives are provident and will see to the needs of the storeroom next summer. "But," plead officials of the ration administration, "please read instructions on the application form."

Plainly stated on each application form is this information: "I desire to feed persons in my household. These basic applications for canning sugar are attached to this form. Shown thereon are their ration book numbers." Applications for canning sugar cannot be honored unless this complete information is provided by the housewife, state officials of the rationing administration.

Each housewife who realizes her error in submitting only the application form from her own book should now send the required additional applications from the books of each member of her family. On each form she should print the serial letters and number from each individual ration book. With these additional application forms she should send a letter, stating once again her name, address, serial letters and number of her personal ration book.

Application may be sent to local ration boards.

"V"

Jerry asks: "Why does the Alberta Social Credit party require so many whips?"

DONATE TO RED CROSS

At a recent house party, celebrating the birthday of Mrs. Binozzo, and attended by many Hungarian friends from Hillcrest and Blairmore, a collection was taken to aid in the current Red Cross campaign for ten million dollars. The sum of \$17,500 was collected and has been duly turned in to the new Red Cross committee.

The spontaneous and generous manner in which these Hungarian-Canadian patriots reacted to such a worthy cause has set an example that can well be emulated by other patriotic Canadians.

The local committee express heartfelt appreciation for this generous donation.

"V"

ACCOUNTS OPEN IN COUPON BANKING

Pink cheques for sugar, yellow for butter and green for tea and coffee, are being written on the many new accounts opened in Canadian chartered banks by institutional and quota users of rationed commodities.

To open an account each user obtains a quota reference number from the ration administration and proceeds as usual. Balance on the month's account may be a credit carryover to the next month, but there are no overdrafts in this kind of banking. Bank managers and staffs are giving every kind of cooperation says C. G. McKee, regional superintendent of rationing, Wartime Prices and Trade Board.

Miss Helen Ozoroff is a patient in St. Vincent's hospital at Pincher Creek.

"I think" are the two most overworked words in the English language, asserts a college professor. Not only that, but in most cases they constitute a gross exaggeration—Washington Post.

"V"

ST. PATRICK'S ENTERTAINMENT

Fairly large audiences greeted the appearance of local players in the St. Patrick's entertainment in the Columbus hall on Wednesday and Thursday nights. The title of the three act farce comedy was "Dame in Distress." In some cases they looked the part and all characters were well featured. The following were leading artists: Miss Anne Kank, Miss Ricca Fumagalli, Miss Nella Rancatay, Mrs. J. Dobek, Miss Laura Piard, Henry Galvon, John Dobek, Miss Anne Kubic, Charlie Amato and Duncan Larabalester, all of whom performed well.

Other features were a tennis drill and a dance entitled "Back to Donegal."

"V"

SEVEN THOUSAND BRIDES FOR CANADA

Mrs. Dutton Brant, mayoress of Brighton, had the idea recently of forming a "Canadian Wives and Sweetheart Club," but she discovered that already 7,000 Sussex girls have married Canadians, that 3,000 of these have had babies, and that Brighton girls are marrying Canadian soldiers at the rate of more than twelve a week. [And, by the way, they're bright.]

Mrs. Brant's idea was to have some place where Canadian soldiers and their wives and sweethearts could drop in and, over a cup of tea, discuss their lives in Canada after the war. Such a move, it was hoped, would create friendship and comradeship which will stand these girls in good stead in their future homeland. But now she has admitted that she understated her task.—Overseas Daily Mail.

A summer school for graduate nurses with training in administration work will be held from May 20 to July 31 by the school of nursing at the University of Alberta.

"V"

HILLCREST HAPPENINGS

A new son was born to Mr. and Mrs. D. Rossi on Sunday last.

A successful whist drive was held in the Catholic hall here, by members of the Blairmore Lodge of Moose and sisters. The time was hailed as most enjoyable by all who attended. Prizes, turkey and hams, were won by Mrs. J. Erick, ladies' first, ham; Mrs. J. Semanick, ladies' second, ham; J. Craig, gents' first, ham; W. Fisher, gents' second, turkey.

TO AMEND WORKMEN'S COMPENSATION ACT

There was good news for working men in the bill to amend the Alberta Workmen's Compensation Act, which came before the house, with Dr. J. L. Robinson as pilot. Following recommendations of the special report on compensation, which had been tabled by Dr. Robinson and his special investigating committee and later endorsed by a voice vote, the new bill contains provisions in line with some of these recommendations.

The new bill will set up a board of three compensation commissioners, instead of the present board, which has a permanent chairman only. It also provides for increased widows' pensions, additional payments for pre-burial expenses, raising the age of dependent children to 18 years and a section giving the board power to set up its own superannuation fund.

Another feature of advantage to workers is that of giving an injured man a period of twelve months following an accident in which to make his claim. Previously this period had been limited to a much shorter time. Increased payments for orphaned children are also provided for.

When the new act becomes law, it is felt by its sponsors that great forward strides will have been made in the matter of workmen's compensation, and that many grievances formerly voiced by workers will be removed.

RED CROSS CLOTHING USED MANY TIMES

Writing on behalf of the Women's Volunteer Service in England, Elsie Dunbar, head of the overseas department, says: "I want to thank you once more for the invaluable and unfailing help we have received from the Canadian Red Cross Society during this past year. Without it, indeed, it would have been quite impossible for us to carry on, and I only hope that the many members of the society are aware of our deep gratitude."

"The clothes you send over here are used not only once but twice, and sometimes three times. A system of clothing exchanges has been devised, whereby mothers of growing children can exchange their outgrown clothes for those of a more suitable size. This applies to boots and shoes, too."

"Thanks to the kindness of people in Canada, we were able to give English children a proper Christmas. It seemed at one moment that this was not going to be possible, as there was a terrible shortage of toys and, of course, no candies. You will be amazed to hear that somebody had the ingenious idea of cutting up the used food tins from the Canadian Red Cross to make Christmas tree decorations."

"V"

Mayor Andrew McGavin, of Victoria, B.C., asks that beer sales be restored to the same amount as last year.

The Calgary and Southwestern Railway Company has been granted a two-year extension of time for the building of a sixty-mile railway line from Calgary into the Burns coal properties west of High River. The company obtained the right to build the line in 1918 and has since spent \$618,000 on grading, surveying and other work.

"OUR SINCERE GRATITUDE FOR FRATERNAL AID"

The Canadian Aid to Russia Fund received this week a message of appreciation from Dr. Kolesnikov, president of the Soviet Red Cross and Red Crescent societies. The cable, transmitted by Feodor Gousev, minister plenipotentiary from the U.S.S.R. to Canada, is as follows:

"Request you to convey our sincere gratitude to Mr. McLean, chairman National Committee Canadian Aid to Russia Fund, and to all members of the committee for their successful work in collecting money for aid to the Soviet Union. The Red Cross Society of the U.S.S.R. highly appreciates the fraternal help of the people of Canada to the Soviet people in its struggle against our common enemy, the Hitlerite Germany. Signed by president executive committee Union Red Cross and Red Crescent societies U.S.S.R., Dr. Kolesnikov."

To this J. S. McLean, in behalf of the national committee of the fund, has replied, requesting Mr. Gousev as follows:

"Please convey to Dr. Kolesnikov, president of executive committee Union Red Cross and Red Crescent societies, our thanks for his message of appreciation concerning the work of the Canadian Aid to Russia Fund. While through our government Canada is supplying the U.S.S.R. government and army whatever we have that is useful in your fight against our common enemy, the Canadian Aid to Russia Fund is a spontaneous voluntary effort contributed by individual Canadians of all sections of our population from all parts of our country to do whatever we can to help alleviate the suffering inflicted upon the citizens of the U.S.S.R. by the brutality of Hitlerite warfare and occupation. Our Aid to Russia Fund expresses the great admiration and warmth Canadian feel toward the heroic Soviet peoples. We are grateful for the Soviets' heroic achievements in destroying our common enemy and deeply sympathize with the great suffering of the Soviet peoples. The Canadian people believe with confidence that the combined efforts of the United Nations will destroy the Nazis and Fascists and will rebuild a world on the basis of peace and mutual respect. We look forward to a despising friendship and understanding between Canadian and Soviet peoples."

Since it was organized a little over three months ago, the Canadian Aid to Russia Fund has collected cash contributions to date amounting to \$2,682,000. In addition, gifts of clothing already shipped in value \$779,730. The gross total to date of subscriptions to the Fund in cash and goods in kind is \$3,461,750.

En route to the Soviet Union now are 38 full Canadian railway freight cars containing clothing, blankets and medical supplies. Further orders have been placed for relief supplies, which will be shipped promptly. All shipments are transported in Russian ships and at the expense of the Soviet government.

Branches of the Fund have been established throughout the Dominion. Many are continuing their activities with special emphasis on the collection of clothing. It is the aim of the national executive to ship relief supplies regularly. The money contributed is being expended in Canada. Goods only, not money, are being dispatched to Russia.

The marriage took place in St. Patrick's church at Lethbridge on March 9th of Leona, daughter of Mr. and Mrs. Edward McDonald, of that city and formerly of Blairmore, to Sergeant Pilot Forbes Mackay Bill, R.A.A.F., the son of Mr. Percy Bill and the late Mrs. Bill, of Bateman's Bay, New South Wales, Australia. Rev. Father P. A. Bergin officiated. They will reside in Vulcan.

BEST ON ALL JOBS

"Galloping Goose" Eats Miles

Recently mentioned in a leading U.S. railway magazine as one of the few "mile-a-minute" local trains in the Canadian Northwest, No. 340, Canadian Pacific Railway's gas-electric unit, makes the 41.64-mile run from Moose Jaw to Regina in 55 minutes, with four intermediate stops to work "local" business. Designed for fast, frequent schedules on short runs, gas-electric units like 340 combine in one unit engine, mail, express and baggage car and passenger coach, and because of lower-cost operation can be operated where it would not be economical to use standard steam trains. Use of units like 340 has become doubly important in war time in conserving fuel and manpower. Fastest portion of 340's Moose Jaw-Regina run is the 10.3 miles from Pasqua to Belle Plaine where the "Galloping Goose," as the train is often called, travels at a speed of 61.8 miles per hour.

HEALTH LEAGUE OF CANADA

GROW YOUR OWN VITAMINS

We all know that vitamins are a "must" in our wartime diet if we are to have the necessary energy and vitality with which to tackle the jobs that lie ahead. And you can get a big kick out of doing it, too! No. Well, what can be done? You can get a big kick out of doing it, too!

Winter is giving its last kick and spring is fast approaching. Take a look at that plot of ground behind the house one of these days and begin planning for that fine vegetable, (or should we say vitamin) garden. Flower gardens are definitely "out" for the duration, as far as leaving the backyard for the children to play in, it just isn't done anymore! Those same children will have a much more enjoyable time helping you when you have planted and cared for yourself. And when you pass your invited guest the cabbage or carrots and say: "I grew these in our own garden," it will give you a glow of pride and satisfaction.

Vitamin carrots, peas, tomatoes, cabbage, lettuce, swiss chard, all these vegetables contain as much vitamin content as the vegetables you buy, too. And what is more, you'll have the satisfaction of having grown them yourself. To say nothing of the excellent exercise you will have in the fresh air, in preparing, planting and harvesting your garden. There's a great pleasure in the packeta for the children to play in, it just isn't done anymore! Those same children will have a much more enjoyable time helping you when you have planted and cared for yourself. And when you pass your invited guest the cabbage or carrots and say: "I grew these in our own garden," it will give you a glow of pride and satisfaction.

Write to the Western Division Health League of Canada, 111 Avenue Read, Toronto, Ontario, for your free copy of our authoritative Vitamin chart.

SUNDAY SCHOOL LESSON

MARCH 21

OUR LORD'S INTERCESSORY PRAYER

Golden text: Holy Father, keep them in thy name which thou hast given me; that they may be one, even as we are. John 17:11.

Lesson: John 17.

Devotional Reading: Hebrews 7:23-25.

Explanations and Comments

Our Lord's Intercession for Himself, John 17:1-5. This seventeenth chapter of John's Gospel gives Christ's great intercessory prayer for himself, for his apostles and for the world. It is often called "Christ's High-priestly Prayer," because in it "he consecrated himself to be priest and victim in the propitiatory sacrifice." Verses 1-3 are his prayer for himself; he has finished his task, the hour is come, and he prays that he may be glorified, "that he may glorify the Father."

To "glorify" means to make intelligible, as well as to magnify and honor, and Christ's words here mean, Show how the character of the Father that he has shown thy character. Jesus was to be made known in his true character, as the divine Son of God, as the Messiah, as the Savior of the world. The meaning of this is indicated in the next words of his prayer: Even as thou gavest him authority over all mankind I "hast" is authority over all mankind. "I" means "myself," and "myself" provides as mortal, that he, to whom thou hast given him, to he should give eternal life.

And then Jesus defined life eternal as "eternal God" and himself, the Son of God. "My" human presumption, since the beginning of the world to the present time, has ever dared to suppose it has with the eternal the extension of time, as of mortal and eternal life. What a wonderful assertion! (Alexander McKenzie).

I give them to you on the earth. Have ye not the mild, humorous and intelligible to men, having accomplished the work which thou hast given me to do.

Our Lord's Intercessory Prayer for His Own, John 17:6-19. These words are his prayer for his own who are in the world, the disciples whom he had kept and guarded and now to leave in the world. He speaks in the presence of the Father the Son speaks of the little circle of chosen followers who had accompanied with him so long and faithfully, and with whom he had such wonderful confidence. He first describes them, as Dr. Erdman says, "in phrases which have a meaning and a meaning for all of us can never be fully understood. Such is the man whom thou gavest me out of the world." They have kept thy word, "the words which thou gavest me... those words which thou didst send me." His prayer for his followers is a prayer for the perfection of the instruments through whom he was yet to reach the world. He asks that they may be kept from evil.

The first group can be put in just as soon as the soil is fit to work, this being when one can get out and dig without fear of cutting roots. Seed working or planting should crumble, not pack into a ball, the experts point out.

Aiming the very hardy are spinach, lettuce, radish and peas etc., among the vegetables, and most of the poppies, cosmos, bachelor buttons and sweet pea flowers. The flowers, except frost will not hurt them, things usually the sooner they are planted the better.

In the semi-hardy line, vegetables and flowers will stand a light frost or two, would be carrots, beets, beans, potato and corn in the vegetable class, and zinnias, calendulas, calla lilies, etc.

The tender plants are those which will not stand any frost at all. If up above ground when the night temperature falls and the day temperature falls below 32 degrees, then only a miracle will save them from blackening. In this delicate line there are the melons, cucumbers, peppers, pumpkins, tomatoes, among the vegetables, and gladioli, dahlias, canna, flowers.

No frost.

There is little to be gained and much risk in rushing the season. This is especially true with flowers. Often when the frost does not kill it will set the plant back so far that the later sown will catch up and pass the first.

HARD ON BOOTS

Even in the British mechanized army a pair of boots lasted only three months in the desert. About 2,000 people, many of them civilians, are employed in the R.A.O.C. base depots in Africa to look after the receipt and issue of equipment.

War needs have greatly accelerated the use of coal as a chemical raw material.

2507

Chased By Plane

Sgt. Pilot Jack Clark of Malton, Ont., hung by one foot, caught in the door of a crewless bomber, (the others had bailed out), and escaped to tell of the experience. He released himself by pulling the ripcord of his parachute, which ripped his foot from his flying boot, caught in the door of the bomber. The plane chased him to earth, but he escaped with only a broken ankle.

Future Of The Arctic

Veteran Sees Great Possibilities And Much Development

David L. McKeand, a veteran of the Arctic, predicted that a 1,500,000-square-mile area of Canada's eastern Arctic zone may see one of the most striking developments of the post-war expansion period.

Addressing a Toronto audience, McKeand told of summer weather in the sub-Arctic region "mild enough to grow good crops of lettuce and spinach under glass."

The tremendous mineral and other natural resources of the area, he said, assure its successful development, while the ocean link between Canada and Russia by the Arctic Sea may be of great trade importance.

HOT ANYWAY

Housewives in a Surrey village in England lined up for their ration of dried egg powder, but were served mustard by mistake, and pies were baked and scrambled eggs made in many homes with surprising results.

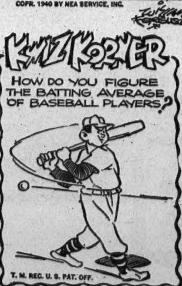

Crankcase oil that is heavier than required causes unnecessary drag on the moving parts of the automobile, thus wasting gasoline.

SANDS OF HAZARD

BY —
J. B. RYAN

CHAPTER X
ANDRE RIBOTT, whatever the cause for his discomfiture, recovered quickly. He returned Imeddin's cold glance with a smile. "I thought you would be detained in argument with the Spahis for the right to punishe Lebeau to surrender him so quickly."

"The foreigners broke jail," explained Imeddin. "We overtook them trying to reach the oasis where the Spahis are out, securing the desert for him and the girl."

Because of the menace of Lebeau, he gave a shrug to Ribott. "I think Kahlri as Storay and Annette would be detained for a long time on the sands Bir Mazoul, like Alm Safa, was classed as a place of water, but there are similar oases. Alm Safa was a spring with enough water to sustain a town; Bir Mazoul was not even a water-hole; the traveller had to dig in the earth to find water, and the sand filled in the crevices well, and the next corner had to scoop out the dirt in turn."

No one lived at the lonely well, yet there were people under the

drooping palms toward which the Kahlri and the sheep were moving. A mile away, Storay saw three dull shapes that took on the outlines of men. "That will be the Germans," Annette said to Storay, "I sent to meet Ribott at Bir Mazoul."

The party had moved out from the oasis, coming to a halt before the camels of Andre Ribott and Imeddin, and out stepped a uniformed soldier with a face and blond hair. "Well, much frenzied," said the soldier, "you have arrived at last."

"Ja, Lieutenant Kolb." Andre Ribott's German was as fluent as his English, and he had a definite schedule, the number of sheep I bring should compensate for the delay."

The vanguard of the sheep, reaching the camels, parted like water at the oasis, and was flowing past toward the oasis. The young lieutenant ran over the gray tide emerging from the cloud of the overhanging haze. "Gut," he grunted again, "you have done well, mein Herr."

And then the eyes in the sun blazed red face discovered the girl and the man on the dromedary beside Ribott. "Wiv am I to get?" Kolb demanded sharply. "According to my information you were to use only native help."

"They are prisoners. Herr Lieutenant, this man is Mein Herr, who killed one of the Berbers."

The girl—"a smile appeared on Ribott's round, dust-stained face"—had never heard of her, Lieutenant Kolb. She is Annette Fournier."

"It is true," the girl agreed seriously. "I am Annette Fournier-Monsieur le Boche."

Lieutenant Kolb smiled, refuted the retort by the epithet. "The High Command will be pleased to see you, Frau Fournier. So famous an agent must have many secrets of their verdant Free French."

The German officer stepped out of his car. The milling, baa-ing sheep impeded his progress, yet he managed to reach the oasis in advance of the animals. With Ribott, Imeddin and the prisoners arrived at the point about the water-hole, Kolb was already ready out of his car, striding quickly among the soldiers grouped beside the huge truck.

The camels knelt. Storay, mounted, glad of a chance to stretch his legs, and assisted Annette from the saddle. "Monsieur Ibn Mulai joined the couple. "This morning we can do, sit?" he muttered. "In the Name of the Prophet, are we to wait until they have knife or pistol to shoot us?"

Imeddin the Lawless touched his long ribs to the elbows of Storay and Mohammed. "You cannot stay here, we must escape where my men can watch you."

The Kahri, as Bedouins do at every halt, were grouped about the sheikh's rifle, Annette and Mohammed advanced dutifully toward the gathering of Bedouins.

Storay followed more slowly, trying to decide whether the quivering of the automobile of Lieutenant Kolb was due to the impact of a bullet or the sound of the sheikh's rifle. Annette and Mohammed advanced dutifully toward the gathering of Bedouins.

Storay stopped him. "I think he is going to shoot us. He has a pistol. If he has his gun, he will shoot us."

"The foreigners break jail," explained Imeddin. "We overtook them trying to reach the oasis where the Spahis are out, securing the desert for him and the girl."

Because of the menace of Lebeau, he gave a shrug to Ribott. "I think Kahlri as Storay and Annette would be detained for a long time on the sands Bir Mazoul, like Alm Safa, was classed as a place of water, but there are similar oases. Alm Safa was a spring with enough water to sustain a town; Bir Mazoul was not even a water-hole; the traveller had to dig in the earth to find water, and the sand filled in the crevices well, and the next corner had to scoop out the dirt in turn."

No one lived at the lonely well, yet there were people under the

drooping palms toward which the Kahlri and the sheep were moving. A mile away, Storay saw three dull shapes that took on the outlines of men. "That will be the Germans," Annette said to Storay, "I sent to meet Ribott at Bir Mazoul."

The party had moved out from the oasis, coming to a halt before the camels of Andre Ribott and Imeddin, and out stepped a uniformed soldier with a face and blond hair. "Well, much frenzied," said the soldier, "you have arrived at last."

"Ja, Lieutenant Kolb." Andre Ribott's German was as fluent as his English, and he had a definite schedule, the number of sheep I bring should compensate for the delay."

The vanguard of the sheep, reaching the camels, parted like water at the oasis, and was flowing past toward the oasis. The young lieutenant ran over the gray tide emerging from the cloud of the overhanging haze. "Gut," he grunted again, "you have done well, mein Herr."

And then the eyes in the sun blazed red face discovered the girl and the man on the dromedary beside Ribott. "Wiv am I to get?" Kolb demanded sharply. "According to my information you were to use only native help."

"They are prisoners. Herr Lieutenant, this man is Mein Herr, who killed one of the Berbers."

"It is true," the girl agreed seriously. "I am Annette Fournier-Monsieur le Boche."

Lieutenant Kolb smiled, refuted the retort by the epithet. "The High Command will be pleased to see you, Frau Fournier. So famous an agent must have many secrets of their verdant Free French."

The German officer stepped out of his car. The milling, baa-ing sheep impeded his progress, yet he managed to reach the oasis in advance of the animals. With Ribott, Imeddin and the prisoners arrived at the point about the water-hole, Kolb was already ready out of his car, striding quickly among the soldiers grouped beside the huge truck.

The camels knelt. Storay, mounted, glad of a chance to stretch his legs, and assisted Annette from the saddle. "Monsieur Ibn Mulai joined the couple. "This morning we can do, sit?" he muttered. "In the Name of the Prophet, are we to wait until they have knife or pistol to shoot us?"

Imeddin the Lawless touched his long ribs to the elbows of Storay and Mohammed. "You cannot stay here, we must escape where my men can watch you."

The Kahri, as Bedouins do at every halt, were grouped about the sheikh's rifle, Annette and Mohammed advanced dutifully toward the gathering of Bedouins.

Storay followed more slowly, trying to decide whether the quivering of the automobile of Lieutenant Kolb was due to the impact of a bullet or the sound of the sheikh's rifle. Annette and Mohammed advanced dutifully toward the gathering of Bedouins.

Storay stopped him. "I think he is going to shoot us. He has a pistol. If he has his gun, he will shoot us."

"The foreigners break jail," explained Imeddin. "We overtook them trying to reach the oasis where the Spahis are out, securing the desert for him and the girl."

Because of the menace of Lebeau, he gave a shrug to Ribott. "I think Kahlri as Storay and Annette would be detained for a long time on the sands Bir Mazoul, like Alm Safa, was classed as a place of water, but there are similar oases. Alm Safa was a spring with enough water to sustain a town; Bir Mazoul was not even a water-hole; the traveller had to dig in the earth to find water, and the sand filled in the crevices well, and the next corner had to scoop out the dirt in turn."

No one lived at the lonely well, yet there were people under the

LOOK OUT FOR YOUR LIVER!

Rock it up right now!

Your liver is the largest organ in your body and most important to your health. It purifies and detoxifies the poisons in your system, allows proper nourishment to your blood. When your liver gets out of order decomposes in your intestines. You become fatigued, listless, lack energy. You feel "tired" headache, backache, dizzy, dragged all the time. You feel "old" and "drowsy". So can you NOW. Try "Triterine" Canada's largest selling liver tablet. You'll be delighted how quickly you'll feel like a new person, happy and well again. 25c. See your druggist today.

the skin Mohammed was to his senses as cold water to the drowsiness of a sleeper.

He recognized the bear-like black berber, the ragged, the automobile in which he had tried to escape. Beyond the charred wreckage Storay noted gray and brown figures scattered under the palms, figures so still that they blended with the background of colorless grass and yellow sand.

He limped half-noly to the nearest body, the body of the Moslem. The body was that of a Kahri, one who had been killed in the brief skirmish between Berber and German. There were three other bodies, all of whom the oasis had buried. One of the bodies was that of Sheik Imeddin, he who had been the first to die.

In a sense of relief filled Jack Storay when he had completed his examinations. None of the bodies left behind by the Germans was that of Annette Fournier.

Storay hobbled to the well beside the thickets of palm trees. At the edge of the oasis the pit had caved in, and Storay was compelled to remove the sand with his hands before he came to the seeping water.

He took from his crippled hands the dried-up monsoon to wash the dried blood and caked dirt from his person. There was, he discovered, a deep gash across the top of his head, a jagged cut on his shoulder, another on his right arm. His right hand looked like a bullet hole, an black-and-blue abrasions all over his body.

He reached for a few dates under the trees and ate them as he sat.

At Bir Mazoul, were food and water.

He could make a bundle of the dates in a cloak, if he could find something to bind them. He found a piece of twine, a piece of cloth, a piece of leather.

BRITISH INDUSTRIES

IN WARTIME

(Article 23, by Walter R. Legge)

To report on British industries was not one of the main objects of our trip to Britain, and we did not make the intensive study of them that we did of the fighting forces and services. However, we were given an opportunity to visit some plants and to see what British workers are doing to help win the war.

Probably the most interesting of plants we visited was an immense underground factory, which was just going into production. These underground factories are not due out especially for the purpose. There are many large caverns, some natural and others the result of years of mining, which can easily be converted into good factories.

A large elevator took us ninety feet below the surface of the ground to where this factory is located. The factory itself covers a vast area and only uses a small part of the cavern. One of our guides told us that he had gone down into the cavern before any work on it had been started, and he would have been lost if he had not been with a local guide who knew it well.

The floor has been cemented and the walls and pillars painted a light color. This underground factory is brilliantly illuminated by fluorescent lights. The ventilation is wonderful. Air is taken in from above ground, cleaned and heated, and distributed by viaducts under the floor, while the used air is carried off at the roof.

An example of modern scientific methods is found in the disposal of sewage. It is pumped to the surface and chemically treated to extract the gases, which are used to propel the factory service cars.

The factory is surprisingly clean and bright. It is hard to believe that it is ninety feet under the ground.

There is a large restaurant underground, as well as another on top of the ground. Each of them is capable of feeding several thousand employees in a scientific and efficient manner.

One of the problems in connection with this factory was the supply of labor. The number of workers at hand was limited. This has been overcome by bringing workers there in large numbers of buses and by building dormitories and houses. The dormitories are made up of single and double rooms, compact, but well furnished and comfortable. The buildings are of stone or brick and appeared to be fireproof and substantial.

The houses, some of which we were shown through, are small, but bright and comfortable, and planned to make the most of every bit of space. They are certainly a big improvement on the average workman's home.

We also visited aircraft factories, aircraft engine factories and munition factories.

One morning we arrived at one of these factories. The entrance was not very impressive. In fact it looked more like some residential flats than a factory. Yet we spent most of the day going from building to building to see various operations in progress. A fine lunch was served to us in the executive offices. The exact number of employees cannot be given, but it was in the tens of thousands.

A very large proportion of the workers are women, many of them doing jobs that it was once thought could only be done by men. Before the war these women were hairdressers, barmaids, waitresses, school teachers, shop assistants, domestics and workers in smaller industrial plants. Others had never worked before.

Some of the machinery in this factory was made in the United States, but much of it bore namesakes of British firms.

The general appearance and operation of this and other factories is about the same as in similar factories in Canada and the United States. However, closer study shows that operations are probably more broken down and scattered than on this side of the Atlantic. There is a good reason for this. In using so many workers with little experience in their particular work, it was easier to teach them one simple operation than it would have been to teach them to handle a complicated machine which would do several operations at once.

The system is more flexible. If some part is knocked out by enemy action or otherwise, the entire production will not be stopped.

These factories are unexcelled for precision of craftsmanship, and their production targets are continually being exceeded. This is going to be a big factor in overcoming the Hun. Latest reports say that the Germans are worried over the superiority of the English in precision and quantity of production.

Most of these employees work fifty-six hours a week. When we had a conference with Britain's minister of labor, Mr. Ernest Bevin, he told us that there is no gain in working more than fifty-six hours a week, and that he was trying to get it down to a fifty-three or fifty-two hour week. He added, "We are in the fourth year of the war. Most of the virile people have been taken for the forces. Age groups in industry are higher. Forty-seven is the average age of the Liverpool dockworkers, and in the building trades the average age is forty-five to forty-six."

We asked two different cabinet ministers if England had reached the saturation point in manpower. One answered that there was no such thing as a saturation point in labor, and the other replied, "We are a long way past the saturation point."

We came away from these factories deeply impressed with the fact that the civilian workers are just as hard at work, just as serious in their task, and just as anxious to do their utmost to hasten victory as the members of the Navy, Army and Air Force.

TEA MADE FROM APPLES

And now you can have a nice cup of apples. Strict rationing of tea and coffee has spurred on the boys in the back room with their test tubes and gadgets to devise tea substitutes and extenders.

One group in British Columbia have come up with a drink called Fru-Tea, made from dehydrated, reconstituted and ground Okanagan apples. Oranges and lemons are treated and added to give it a brisk, refreshing flavor.

It is an ideal extender for tea, say its mixers, mixed in quantities to suit the individual taste. It is said to be rich in natural fruit sugar, calcium and phosphorus, and, of course, does not require coupons.

Rock so soft that it bends like wood is found not far from Brazil's deposits of diamonds, valued for their hardness.

Thomas W. Lamont, hand-picked in 1911 by the founder of J. P. Morgan & Co. Inc., has been chosen chief of the famous banking firm, succeeding the late J. P. Morgan.

RATIONING FOR VICTORY

tough job ahead.

"Not what you desire,
But what you require,
That's the new motto.
We shoppers have got to
Most quickly acquire."

So runs one of the "Pull Together Canada" songs, describing the spirit that will make our ration books weapons for victory. With this spirit, government, farmer, merchant and consumer alike can handle our food for greatest good of all, voluntarily sharing profits and hardships, and demonstrating that "there's enough for everybody's need, but not for their greed."

The real test today is not whether we realize the kind of life and death struggle we are engaged in. When we see that the issue must be Victory—or the clock goes back a thousand years—then rationing assumes its rightful proportions. Then we gladly accept the sacrifices which will dot the 'V's and cross the 'D's and put a capital V in front of total victory.

Carry your registration certificate.

Sacrifice isn't a thing you can weigh in pounds or count in dollars.

As we go to press we learn that Mrs. Pauline Jillian, of Blairstmore, has passed away in St. Vincent's hospital at Pincher Creek. The remains will be brought to Blairstmore for interment, service to be held at St. Anne's church on Saturday at 10 a.m.

Officers of the Pincher Creek and District Fish and Game Association for the current year are S. Walker, president; F. Frey, vice-president; C. S. Buchanan, secretary-treasurer. Their finance committee reports gratifying results in the campaign for funds to enlarge the rearing pond project. They already have \$600 in hand. At a recent meeting a resolution was passed protesting against the grazing of sheep in certain areas of the district. Steps are already being taken to have Chinese pheasants planted in the district, which of course includes the foothills. Steps should be taken to organize a similar branch association in the Crows Nest Pass, so as to be in a position to co-operate as far as possible with Pincher Creek.

WARNING

CANADA FACES A WOOD-FUEL FAMINE
NEXT WINTER

ARE YOU one of the Canadian householders who burned fences, doors, and even flooring to keep warm in this winter's sub-zero weather?

Or perhaps you are one of the lucky ones who just managed to scrape through?

In either case, you will want to be prepared for next winter when greater hardships loom unless you take immediate action.

The shortage already has affected many communities . . . total stocks of dry wood are nearly exhausted . . . in some places the small supply of green wood cut for next winter is being used *now* to meet the present emergency.

Throughout most of Canada, fuel-wood is obtained not far from where it is produced. Its production and distribution are the business of local citizens.

The Dominion Government recognizes that the wood-fuel shortage is so serious that even with the full co-operation of everyone in affected communities an adequate supply is not assured. Accordingly, it has been decided to stimulate the output of wood-fuel by assisting those normally engaged in its production and distribution. To this end, the following measures will be adopted:

1 A subsidy of \$1.00 per cord will be paid to dealers on all commercial fuel-wood contracted for and cut on or before June 30, 1943, and held to dealers' account on that date.

2 The Coal Controller has been authorized to arrange in his discretion for the payment of such portion of the transportation costs as he considers proper in respect of fuel-wood, particularly in cases where dealers, to procure supplies, find it necessary to contract for fuel-wood at locations outside the area from which they normally derive their supplies. In order to obtain any such reimbursement, dealers must obtain a permit from the Coal Controller before contracting for such supplies.

3 The Coal Controller will repurchase from dealers at dealer's cost all commercial grades of fuel-wood on which a subsidy of \$1 per cord has been paid and which are still in dealers' hands as at May 31, 1944.

4 Assistance will be given in providing priorities for necessary equipment.

5 Farmers now on the farm, and who leave the farm temporarily in response to this appeal to engage in fuel-wood cutting, will be deemed by National Selective Service to be carrying out their regular occupation as farmers and will be given all the rights of deferment of military service which such an occupation now carries. Such temporary absence should not, however, interfere with agricultural production.

Municipal councils, farmers, fuel dealers, individual citizens, service clubs, and all other groups in communities where wood-fuel is burned, are urged to begin at once a rapid survey of their local situation, and to take immediate action to relieve the shortage.

GROWN IN SUNNY, SOUTHERN ONTARIO

Island Of Malta

ALTHOUGH THE WAR is not ended, and without doubt much history will yet be written, there have already transpired many epic events which will never be forgotten. In the Russian campaign, there are the sieges of Sebastopol, Moscow and Stalingrad, and many other heroic actions which will live on in the history of Russia and in all the records of this war. In the United States the names of Pearl Harbor, Guadalcanal and Bataan stand out as symbols of events of historic significance. Diepp will never be forgotten by the people of Canada, and in Britain there is Dunkirk, the first of many names to assume a deep and lasting meaning in connection with this war. The heroic defense of the Mediterranean fortress of Malta will undoubtedly have a place in this list of remembered events, for this island has had an important and exciting part in the Battle of the Mediterranean and in the campaign in North Africa.

Malta As An Air Base

Of Malta, much has been written. Probably the most bombed place in all history, it had over three thousand air raid alarms before November, 1942. Before that date, the ground defense of the fortress, and R.A.F. planes based there, had destroyed 1,138 enemy aircraft. Until France fell, Malta was important only as a naval base, but it then became a target for fierce Italian air attack, and its value as an air base was established. At the time the enemy air attack started, there were only three obsolete British "planes on the island. Today, Malta is known as the "unsinkable aircraft carrier," and her impregnable defense is a source of great irritation to the Axis. Many Canadians have fought at Malta, including Flying Officer George Beurling, D.S.O., D.F.C., D.F.M. and Bar, who reward for the destruction of 29 Axis planes over Malta has made him Canada's leading air hero in this war. Flying Officer Beurling has been in Western Canada recently in the course of a tour of the Dominion.

Located Near African Coast

Malta is an island in the Mediterranean, situated 58 miles south of Sicily and 150 miles north of Africa. It has an area of 95 square miles and has several fine harbors, the largest one being at Valetta. In the past, Malta has been known to the world because of its importance as a naval base, but it has a well-developed agricultural industry, vegetables, cotton and tropical fruits being produced. There is also some manufacturing, and in normal times it is an important commercial centre for merchant ships, with fine facilities for re-loading and storage. The history of the island dates to 1000 B.C., when it was settled by Phoenician traders. After that it changed hands many times, but in 1814 it became a British dependency, administered by a resident governor. With the other Mediterranean strongholds of Gibraltar, Cyprus and Alexandria, Malta has played an important part in making possible the sea and air victories in that area and in the campaign in North Africa. There is no doubt but that the name of Malta will stand out among those made illustrious by valiant action in this war.

Recipe Of The Week

Baked Fish with All-Bran Onion Stuffing is definitely a recipe with a future. It makes its appearance just in time to provide a delicious meat-alternative for Lenten days that occur with great frequency during the Lenten season. Crispy skin All-Bran onion stuffing is sweet as a nut flavor to the savory bread dressing which when baked in a tender fish is sure to bring applause for the cook. The recipe goes like this:

BAKED FISH WITH ALL-BRAN ONION STUFFING

- 1 (3 to 4 pound) fish
- 2 teaspoons salt
- 1 recipe All-Bran Fish Stuffing
- 2 tablespoons melted butter
- or salad oil
- 1/2 cup All-Bran

Fish cleaned and prepared for stuffing. Wash thoroughly and wipe with cloth. Rub cavity with salt. Stuff and sew edges together with heavy thread. Place on greased oven-proof platter or baking pan and brush with melted butter or salad oil. Sprinkle paprika lightly over top. Bake in hot oven (450 to 475 degrees F.) for 30 to 40 minutes, until well browned. Garnish with quartered lemon. Yield: Six servings.

ALL-BRAN STUFFING

- 1/4 cup fat
- 1 tablespoon scraped onion
- 1 1/2 cups All-Bran
- 1/2 cup All-Bran
- 1/2 cup lemon juice
- 1/2 cup chopped parsley
- 1/2 teaspoon salt
- 1/2 teaspoon pepper

Heat fat, add onions, bread crumbs and All-Bran; stir over low heat until crumbs are lightly browned. Add lemon juice, parsley, salt and pepper.

Yield: Sufficient stuffing for 3 to 4 pound fish.

Note: 1 to 2 tablespoons water may be added if moist dressing is desired. Baked Fish with stuffing to which crisp shredded All-Bran added a sweet as a nut flavor makes meatless days easy to take and win applause for the cook.

There are more than 100 different types of iron and steel nails on the market.

Desert Victory

Pictures Taken During British 8th Army's March To Tunisia

The story of the British 8th Army's march from Egypt right across to Tunisia retold in "thousands of British cinemas." While the march was going on cameramen of the Army Film Unit kept right up with the forward troops and tanks to get the best pictures; in fact, they were so keen that at one time they actually got ahead and reached Tobruk four hours before the 8th Army did. An R.A.F. film unit was there the day too. The film is called "Desert Victory."

SWINE DISEASES

Anemia Kills More Baby Pigs Than Disease From All Other Diseases

This is the last of a series of six articles by J. L. Miller, V.D., provincial veterinarian, Regina, dealing with the more prevalent diseases previously published—Hemorrhagic Mycotic and Baby Pig Diseases; Mange and Disease of Swine; Encephalitis; Worms.

In swine herds there may be pigs which are anemic and in all other diseases put together. Iron is necessary for the building up of the blood. Sow's milk is low in iron content, consequently the pigs frequently suffer from lack of iron in their diet. Pigs which recover from this disease are weak for some time after and are therefore considered much more susceptible to other diseases.

Symptoms: Suckling pigs which are closely confined and not allowed access to soil will do well until they are about two to six weeks old, then they lose their normal healthy color becoming pale. This is particularly noticeable about the ears which are chalky white in appearance. Moderate diarrhea is common but not fatal; otherwise, they may look quite normal and appear fat and chubby. If treatment is not adopted at this stage pigs will gradually lose weight.

Treatment: Treatment should be started early to be effective. A solution containing the following ingredients should be given to sows in amount of citrus pulp per pint—1 lb. water—to make one pint. Give daily for a few days, then follow the method described below. An eye-dropper can be used for dosing baby pigs.

Prevention: Starting when pigs are 10 weeks old a piece of raw liver should be placed well back in the mouth of each pig every week or ten days. This will help to build up the iron through the diet. Another practice is to place a piece of turf in the pen daily so that pigs can get iron by eating the earth and green roots. Sprinkling the ground with iron sulphate also makes it better for this purpose. As soon as pigs are weaned and eating solid food the danger of anemia is past.

HOG LICE

Lice are blood sucking insect parasites which are a continual source of irritation to infested animals. Lice are responsible for quite heavy losses in hog production in heavily infested hogs of all ages.

In obtaining their food, lice penetrate the skin of the host animal and suck the blood. A new pupa is formed in the skin and comes to a long feeding, therefore the irritation caused by these parasites is almost continuous. In an attempt to relieve the intense itching, infected animals scratch themselves and rub against any convenient object. Frequent rubbing destroys the hair and often causes sores in the skin. Hogs infested with lice are often listless and feverish from a lowering of the vitality and general unthriftiness.

The presence of lice is easily detected. The female is the largest louse commonly found infesting animals. The adult female is almost a quarter of an inch in length, the male is slightly smaller. They are a grayish-yellow color and seen on the entire life cycle is spent on the host. The females deposit their eggs on the bristles close to the skin. Eggs hatch in from twelve to twenty days, and young lice immediately begin to lay eggs in about twelve days. Lice, when separated from the animal, live only two or three days. They pass round and round and seek another when hogs come in close contact.

Practically all cases of infection occur from contact with lousy animals and not from infected premises. As a result many mistake however, it is always well to clean and disinfect any premises which have been occupied by hasty hogs. The coal tar soap dips, followed according to instructions, and the container are suitable for this purpose.

Treatment: The two most effective remedies for controlling lice are pyrethrum powder and kerosene oil, or kerosene oil emulsion applied by hand. Used crank case oil is a good substitute for crude petroleum, and can be used in place of the addition of distillate or kerosene, one gallon to ten gallons of water, which increases its effectiveness.

Kerosene oil emulsion is usually applied by hand, and is not preferable for use in dipping vats. It is prepared as follows: Slice and dissolve half a lb. of soap in a gallon of water, heat the water and the soap is dissolved. Add two quarts of kerosene, agitating the mixture until no free kerosene is observed on the top of the liquid, add this solution to ten gallons of soft water and apply by hand.

Treatment for lice should be repeated in fifteen days if found necessary.

GORILLA AND HARMLESSNESS

Baboon pigs in zoos, where the sex is lacking in baboons, are frequently born dead or die shortly after birth. On close examination, the bodies of these pigs are found to be normal or nearly so. They are born in this condition due to lack of iodine in the diet of the mother.

Prevention: Provide all brood sows with an adequate supply of iodine. Iodine can be obtained in iodide mixed with 200 lbs of common salt as is considered to be adequate for this purpose and should be fed for at least three months during pregnancy. Another dependable method is to prepare a solution of one ounce of potassium iodide in one gallon of water and place a tablespoonful of this in the food daily during pregnancy.

A Stockholm report broadcast by Radio London said Gestapo Chief Heinrich Himmler has forbidden German policemen to name their horses "Adolf".

GEMS OF THOUGHT

CHEERFULNESS

What sunshine is to flowers, smiles are to humanity. They are but trifles, to be sure; but, scattered along life's pathway, the good they do is incomparable.—Addison.

The highest wisdom in continued cheerfulness; such a state, like the region above the moon, is always clear and serene.—Montaigne.

The mind that is cheerful at present will have no solicitude for the future, and will meet the bitter occurrences of life with a smile.—Horace.

Happy are the people whose God is All-in-All; who ask only to be judged according to their works, who live to love.—Mayer Eddy.

Cheerfulness is a friend to grace; it softens the heart in time to praise God, and so honors religion by proclaiming to the world that we serve a good master.—Be serious, yet cheerful.—Thomas Watson.

Always look out for the sunlight the Lord sends into your days.—Hope Campbell.

The lowest spot on the earth's surface is the Dead Sea, 1,290 feet below sea level.

First jury composed entirely of women sat at Paxtux, Md., in 1856.

Victory Gardens

Canadians Are Urged To Grow Vegetables This Year

An appeal for all-out cultivation of victory gardens was issued by Canada's agricultural supplies board.

During 1943 amateur gardeners will be encouraged to forego competition as to who can produce the best rock garden, petunias or roses. The emphasis is definitely on tomatoes, carrots, cabbages, onions, beans and other vegetables.

A large proportion of Canada's farm output will be needed for the armed forces of the United Nations and the people of the United Kingdom. The board said there was sufficient vegetable seed to meet all requirements.

"Modernistic" setback skyscrapers are thousands of years old in design, the ancient southwest Indians having used the idea in their communal houses.

Two Women of Auxiliary Air Force Carry On During A London Air Raid

When two WAAFs (Women's Auxiliary Air Force), one 22 and the other 18, were operating the winch for regulating the height of a balloon during a recent night raid on London, two bombs fell almost together to land about 25 yards on each side of them.

But they carried out the operation which sent the balloon to the proper height. This devotion to duty and disregard of danger was brought to the attention of all ranks in a special order by the Air Officer Commanding Balloon Command, Air Marshal Sir Leslie Gossage.

They are in this condition due to lack of iodine in the diet of the mother.

Prevention: Provide all brood sows with an adequate supply of iodine. Iodine can be obtained in iodide mixed with 200 lbs of common salt as is considered to be adequate for this purpose and should be fed for at least three months during pregnancy. Another dependable method is to prepare a solution of one ounce of potassium iodide in one gallon of water and place a tablespoonful of this in the food daily during pregnancy.

Bombing Raids On Enemy Have Telling Effect

London.—Sir Archibald Sinclair, air secretary, said that the R.A.F.'s ceaseless bombing offensive which is showering Germany and the occupied countries with fire and explosives at the rate of more than 10,000 tons a month has wrecked more than 2,000 German factories.

Sir Archibald, speaking in the House of Commons in representing the air estimates, estimated that the R.A.F. smashes at Germany had left more than 1,000,000 Germans homeless.

Declaring that photographic reconnaissance showed that the raid on Essen, home of the Krupp arsenals, on the night of March 5-6 "probably was the heaviest blow struck at German war industry in the whole of the bomber offensive," Sir Archibald disclosed.

The devastation at Essen, he said, was comparable only to that caused at Cologne last May in the first of the R.A.F.'s 1,000-bomber raids. Direct damage to steel works in the Ruhr and Saar, he declared, had cut 1,250,000 tons from Germany's annual steel-making capacity.

Damage to the Phillips radio works at Eindhoven, Holland, cost the Germans the loss of millions of radio tubes and a critical loss in modern warfare, it added.

The 4,000 tons of bombs dropped in the rising offensive in March compared with 10,000 tons dropped in the short month of February, greatest month yet for the R.A.F., when 1,000 tons of bombs were dropped on three different nights.

Promising even greater exertions by the R.A.F., Sir Archibald added a statement which seemed an implicit answer to criticism of the U.S. army air force's day bombing policy.

"The Americans are lion-hearted, skillful fighters," he said. "Their methods are a complement to our own. They are precious and welcome allies. The more American bombers come to take part in the air offensive, the better we shall be pleased and the sooner the malignant power of Germany will be broken."

Sir Archibald also informed the house that more than 10 per cent of German aircraft in which the last three months attempted weak reprisals for R.A.F. bombings had been shot down. Such a loss rate is generally considered almost prohibitive for an attacking air force.

He said 46 of 392 enemy planes which crossed the British coast in daylight during the last three months were definitely destroyed. Twenty-six of 240 which crossed at night were knocked down.

The air minister said this was nearly three times the rate of loss of British aircraft attacking Hitler's Europe.

The R.A.F. bomber command's "pervading offensive" had caused the Germans to switch a not unimportant proportion of their plane-building capacity from bombers to fighters, the air secretary declared.

DAIRY FARMERS

Survey To Determine Costs Of Dairy Production In Manitoba

Winnipeg.—Hon. D. L. Campbell, Manitoba minister of agriculture, announced in the legislature that a survey to determine costs of production in the dairy business has started.

Mr. Campbell said two men had been assigned to supervise the business of about 90 dairy farmers, most of them located near Winnipeg. The survey, he said, would be mainly to determine the cost of fluid milk production.

A similar survey has been made in Ontario and another will be made in Alberta, the minister said.

HAD NO COMMENT

Eden Made No Further Statement On Chaining Of Prisoners

London.—Foreign Secretary Eden declined in the House of Commons to make any further statement about the chaining of Canadian and British prisoners of war in Germany.

Eden said Feb. 11 that the London and Ottawa governments have been in consultation.

(Canada and Britain last December abandoned the shackling of prisoners which had been started in October because the Germans had bound men taken at Dieppe.)

In buying War Savings certificates you combine patriotism with self-interest. Here is gilt-edged security—Canada's finest investment.

Squares Accounts With Father Howe

Back in Canada after winning their commissions in the R.C.N. overseas are these two well-known young Ottawa, Ont., naval officers—Sub-Lieut. Peter G. Chance, R.C.N., left, former Canadian junior skating champion, and Sub-Lieut. William Howe, R.C.N., son of the minister of munitions and supply, the Hon. C. D. Howe. Both have had exciting adventures overseas, young Howe having been torpedoed on H.M.S. Dorsetshire, to square accounts with his father, who was "tin-fished" early in the war as a passenger on the merchant ship Western Prince.

French Resist Nazi Attempts For Forced Labor

London.—The growing unrest in France has been climaxed by an attempt to assassinate Marcel Deat, French collaborationist and close colleague of Pierre Laval.

Radio reports of the attempt on Deat's life—the third abortive effort to kill him—say it occurred at his estate southeast of Paris.

The patriots planned their assassination very carefully, and cutting the telephone lines leading to Deat's country place at Arbois.

The Berlin radio said several men shot at the collaborationist with automatic pistols. All the shots missed Deat, but one member of his party was said to have been wounded slightly.

Deat was the editor of the former Radical-Socialist newspaper *L'Offre* and chief of the People's National movement, once an advocate of collaboration with the Germans.

An attempt to assassinate him was made at Versailles in August of 1941, and he escaped an assassin's bomb in April of 1942.

Elsewhere, radio Paris reports rioting and guerrilla activity throughout France as intensified resistance to the Gestapo's round-up of slave labor for Nazi war factories.

Fighting French headquarters said French guerrillas ambushed a German troop column in the narrow streets of Lyon, wounding 29 soldiers, as resistance to the Nazi mobilization of labor increased throughout France.

The French patriots also blew up a German munitions train between Valence and Vienne in southern France, killing upwards of 70 troops.

Fighting French sources believed on the basis of late accounts that more than 500 German soldiers had been killed since the roundup of Frenchmen for war work in Germany was intensified four days ago.

A spokesman said French guerrillas numbering many thousands was master-minded by a committee known as the "Secret Five," which included former French army officers.

Reports from the French under-

ground said many secret organizations are fully armed and waiting for the signal to strike against a Nazi campaign to draft 400,000 for labor building at Clermont-Ferrand and that widespread searches for hidden arms are being carried out.

Frontier sources said desperate Germans have mounted machine guns in the corridors of the war ministry building at Clermont-Ferrand and that widespread searches for hidden arms are being carried out.

Reports from Savoy said all roads and mountain passes are being patrolled by French police and Italian troops, but that hundreds of Frenchmen are escaping from the towns to avoid deportation to Germany and are joining guerrilla bands.

The navy, with the support of the air force, has carried out its task, he said, and in addition has carried troops all around the world.

"I feel I am entitled to say to the house that whilst no one is more moved in his emotions, more grateful for the wonderful work of the men at sea, we have some reason to be grateful to those who guide the whole of the strategical and practical planning at the admiralty."

The first lord denied charges he said were "bandied about" that the admiralty is not air minded.

"You have never faced such a naval situation before in your history and it is because of the sense of urgency felt by the admiralty that we have been able to deal with the situ-

tary mission to Washington; U.S. Under-Secretary of State Sumner Welles and Dr. H. B. Butler, warden of Nuffield College, Oxford, and Minister of the British Embassy at Washington.

terial mission to Washington; U.S. Under-Secretary of State Sumner Welles and Dr. H. B. Butler, warden of Nuffield College, Oxford, and Minister of the British Embassy at Washington.

Director Of Education

Colonel the Rev. George G. D. Kilpatrick, D.S.O., B.A., D.D., Principal of the United Theological College of Montreal, who has been appointed Director of Education (Army). Col. Kilpatrick is a veteran of the First Great War and Chaplain of the C.O.T.C. of McGill University.

tion and at the same time come to the help of other services as well," he said.

When he went to the admiralty in May, 1940, he said, the Skua and Swordfish were the only aircraft flying operationally with the navy. In that year priority was given to building fighters for the defence of Britain, "and if we had lost control of the air then we should have lost the whole battle."

Looking back three years and remembering the casualties, Alexander suggested the fact that Britain has the same number of aircraft carriers afloat, a large number of auxiliaries and an expanding fleet air arm did not seem to indicate the admiralty had been idle in meeting the aerial threat to communications.

The first lord said the admiralty had not been able to obtain from the government all the aircraft it wanted for the coastal command, but had got for the coastal command, but had got "sufficient to make a great change in the situation."

He referred to the question of increasing the number of fast merchant ships, brought up earlier by Emanuel Shinwell, Labor, saying that to have nothing but fast ships would obviously be ideal, but until the American building program was well under way the safest thing was to get the largest output of tonnage with the labor and ships available.

SUPPLIES OF FEED

Alberta Has Plenty Of Feed For Livestock Which Has Withstood Winter Well

Edmonton.—A survey of livestock and feed supplies in Alberta revealed livestock had withstood the winter well and there are large supplies of feed on farms although an estimated one-eighth of the area seeded to cereal crops was still under snow.

Feld inspection reports indicate the unthreshed grains entered March in fair condition. Condition of the grain finally, however, depends upon the spring weather, thawing and freezing and availability of labor and equipment action now and the time it is brought in.

Due to the large supplies of grain and fodder available for feeding livestock will probably go on pasture in excellent condition, it was reported.

ACT IS EXTENDED

Washington.—An act extending the lend-lease act another year was passed by the house of representatives after it rejected a move to give congress veto power over any final settlement between countries on the mutual-aid pacts.

U.S. ARMY PLANS

Would Build Up A Total Strength Of 8,200,000

Washington.—Upholding the United States army plans for a total strength of 8,200,000, Wyo. Secretary Stimson said that America's enemies have about 17,000,000 men under arms.

Estimates based on the best available information, he said in his broadcast speech, are that Germany and her allies have 14,000,000 men in Europe, and "Russia and Britain together have a much smaller number." In Asia, he said, the Japanese have approximately 3,000,000 men under arms.

A comparison of combat units, said the secretary discloses an even greater disparity—Germany 300 divisions, Italy 80 divisions, and Germany's European satellites another 80 divisions or a total of 460 divisions in Europe. Japan has some 86 divisions.

America's plans, on the other hand, call for organization of approximately 100 divisions, the secretary said.

HELP PROMISED

When Europe Is Invaded War Reporters To Get Full Story

New York.—War correspondents will be given every facility possible to cover the Canadian forces when they take part in the Allied invasion of Europe. Joseph W. G. Clark, chief of information of the armed forces, said on his arrival here by plane from Britain.

He said the object of his overseas trip was to ensure that the Canadian people will get the full and complete story.

Co-operation between the information branches of the Canadian army, R.C.A.F. and Royal Canadian Navy, all under Mr. Clark's direction, he found to be excellent.

Germany Is Now Preparing For A Total War Effort

Ankara, Turkey.—A traveller just arrived in Turkey from Germany said the Germans are feverishly preparing a 1943 offensive against Russia in which they plan to use 30,000,000 to 4,000,000 men in a final great attempt to conquer the Soviet.

This traveller said the Germans' principal aim would be to destroy Russian military strength rather than try for vital Russian strongholds and economic resources as last year.

It was reported in reliable quarters that the Germans in Turkey are being called home for military service. A well informed Balkan source said the Germans are building a quadruple depth line of anti-tank defenses between Grecian Thrace and Macedonia against Allied invasion.

The line is said to extend from Dedeagach and the Aegean sea near Ankara, northwest to Portolago in Macedonia, where it may link up with another line of defenses westward.

It also was reported that all aircraft have disappeared during the last 10 days from the formerly well-supplied Greek airfields of Tatol near Athens and Sedes near Salonika.

Nearly 300 planes were said to have left the Tatol airport in the direction of Africa.

Hilter in the past few days has sent notes to all his southeastern European allies setting forth details of Germany's new "total war effort" and demanding that these allies should make similar efforts, according to information received in diplomatic quarters here.

In these notes, despatches since March 1, Hungary, Croatia, Slovakia, Rumania and Bulgaria have been called upon to contribute soldiers, workers and economic aid to the Nazi Reich, each nation according to its capacity.

The note to Bulgaria, diplomatic sources said, took a threatening turn. It was said to have warned that "if Bulgaria fails to accept sacrifices, her alliance with Germany demands that she will repudiate, because Germany is determined that her allies must collaborate in the fullest sense of the word."

King Boris has not yet replied to the note, it was said, and he is reported trying to find a means of avoiding meeting the German demands, details of which were not disclosed.

This report said that Bulgaria is in such a state of disorganization due perhaps to deliberately bad administration, that it is utterly impossible for her to take part in any military activities in the immediate future.

CANADIAN GENERAL ELECTRIC CO.

Everyone who plants a garden will help to solve the problem of feeding of the nation.

The name of A. S. McDonald, of Bellevue, was included in the army active service enlistments last week end.

Shortages of beer in taverns and brewers' retail stores across Canada has started a large volume of protest to Ottawa against restriction responsible for the so-called scarcity.

Mr. and Mrs. G. A. Passmore left for Cranbrook by Saturday night's train, where Mr. Passmore will undertake medical treatment. He has been feeling unwell for a considerable time and needed a rest. He is being relieved here by Mr. Totten.

The death occurred in Calgary on Friday last of Joseph Erastus Wright, aged 83. Born in Port Hope, Ontario, Mr. Wright came out to Red Deer in 1892, and farmed there until 1896, later going into partnership with the late W. L. Ouimet as general merchant in Red Deer and Coleman till 1911, when he moved to Calgary. He is survived by his wife, several stepsons and stepdaughters, and one brother, John H. Wright, of Red Deer.

Local and General Items

The Editor will be glad to receive items for this section, regarding visitors entertained, parties leaving for holidays or short trips, bridge parties, tea, showers, presentations, anniversaries, etc. Phone items in to 11 or hand them at the Enterprise office not later than Thursday evenings.

Matthews Music House Ltd., Calgary, has been closed for the duration.

British stocks of Scotch whisky and other liquors will be exhausted by 1945, it is claimed.

Jack Rajala, well known Greyhound bus driver in this region, has been transferred to Alaska.

Alberta's share of the Red Cross fund campaign is now considerably over the half-way mark.

T. B. Northfield, optometrist, formerly of Lethbridge, is now associated with Dr. E. J. Anderson in Calgary.

So far no less than fifteen members of Calgary's police force have gone on active service in the present war.

The Old Timers' dance at Lundbreck and the St. Pat's dance at Coleman on Wednesday night were both well attended.

The ladies of St. Luke's Guild will hold a tea in their hall on the afternoon of Saturday, May 8th. Watch for further particulars.

The regular meeting of Blairstown Lodge of Elks on Tuesday night was well attended, when quite a large class of candidates were initiated.

Canada's double-edged social security scheme is now being considered in Ottawa. It will provide works projects for the first year or two after hostilities have ceased.

To relieve our limbs of what appeared to be rheumatic pains, we went them to Wal Eddy on Wednesday, on which to trip the light fantastic in his good old way at the Lundbreck Old Timers' annual get together. He brought 'em back quite supple.

In the house at Edmonton early this week, Angus Morrison, Labor member for Edson, stated that the Alberta legislature would some day rue its policy of paying mining inspectors that measly \$200 a month, and called for action to raise same.

Calgary Albertan employees have formed a credit union, to be known as the Alberta Employees Savings and Credit Union. Gilbert McGregor is president; Robert Pearson, vice-president; William Campbell and Stanley Green, secretary and treasurer.

The remains of Mr. A. Shaw, who died in Edmonton last week end, were taken to the Creston, B.C., district for burial. Mr. Shaw had for many years been in the employ of the Swift Canadian Co., and was fairly well known in this district. He was 56 years of age.

The marriage of Miss Isabella McCulloch, daughter of Mr. and Mrs. Johnston McCulloch, of Coleman, to Herbert E. Richards, son of Mr. and Mrs. Daniel Richards, of Hillcrest, took place at Coleman on Saturday afternoon last, Rev. J. E. Kirk officiating. The young couple will make their home in Hillcrest.

Former vice-president of the United Farmers of Alberta, Edward Gilbert Huthan Scholefield, died in Calgary on Tuesday, aged 73. He was a member of the Church of Ascension, Crossfield, and of the Crossfield Oldtimers' Association and the Masonic Lodge. The remains were laid to rest at Crossfield yesterday afternoon, with Rev. A. D. Currie officiating.

The Edmonton Trades and Labor Council went on record Tuesday, advocating abolition of the present quota system of sales in beer parlors as a means of eliminating dissatisfaction with the system. The council recommend that beer parlors open from noon until 8 p.m. The council also protest the extra charge for coffee and other beverages at meals.

G. W. Grant, of Hillcrest, has joined the active army in Calgary.

Canada's fourth Victory loan campaign for \$1,100,000,000 will open on April 20th.

The third Wednesday in July will see the official opening of the 31st annual session of the Grand Lodge of Elks in Calgary.

The postwar problem in Britain is going to be one of finding enough persons for the jobs—not unemployment, claims a correspondent.

Section Officer Rhoda C. Keir, recruiting officer for the R. C. A. F. (Women's Division) will be in Blairstown on Friday next, March 26th.

George Wilson Grant, of Hillcrest, and Avard Lloyd McDonald, of Bellevue, were among the latest enlistments in the Canadian Army at Calgary.

Sergt. James Frewin, of the R. C. M. Police, one time well known in Alberta when stationed at Lethbridge and other points, is now stationed at Windsor, Ontario.

Hon. Lucien Maynard and Hon. D. MacMillan left Edmonton for Ottawa last week end, there to state the case of Alberta farm debtors before the Dominion officials.

Acting Works Minister Anscomb told the British Columbia legislature that because Ontario and Alberta had done something stupid in closing their government houses, that was no reason why British Columbia should be stupid. Mr. Anscomb was speaking on a motion by the Burnaby member that the province's residence for the lieutenant-governor, with its 20 acres of parks and gardens, be converted into a home for the aged. The motion was defeated.

No matter who gets the neck and the wing of a chicken, we know who gets the bill.

At least one Newfoundland sealing steamer is prosecuting the voyage this spring, the Neptune.

C. W. May, of Calgary, has been appointed assessor for Coleman, and E. D. Battum, also of Calgary, as auditor.

Tobacco taxes authorized by the Wartime Prices and Trade Board add from one cent to two cents on fourteen differently priced cigars.

Helping to House Canada's War Workers

WHEN the huge shell-filling plant came to his town, Charles Hunter got to thinking about the critical shortage of housing . . . and about the two large cottages he owned. It wouldn't cost much to modernize and sub-divide them to make comfortable homes for four families.

He talked it over with his bank manager, who extended him a \$600 loan. With the money, Hunter not only converted his cottages but took part of the loan, along with some of his rental income, to remodel another house to accommodate eight single individuals.

With the aid of the bank Hunter helped to provide urgently needed homes for war workers. He has now paid off all but \$100 of the loan. A very small amount paid out for interest has thus enabled him to more than double his former revenues.

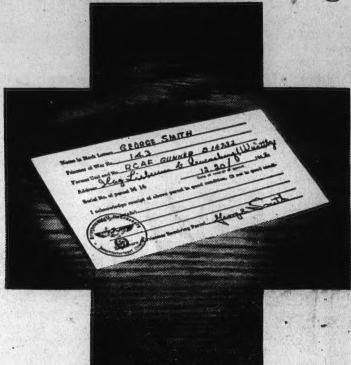

Such modest, highly useful loans typify the contributions that the banks make to Canadian enterprise. The above story is an actual case—the name has been changed.

More than 5,000 experienced bank men out of 14,433 have gone into the armed forces since war began. This throws a greater burden on remaining staffs and new employees. Do your banking early in the day. Pay small bills by cash instead of cheque wherever possible. It all helps.
